OCT 18 2005

SUBJECT: Manufacturer Certification, MIL-STD-790 Product Assurance Program,
MIL-PRF-28876 and MIL-PRF-29504

Mr. Bob Rubino
Stran Technologies
39 Great Hill Road
Naugatuck, CT 06770

Dear Mr. Rubino:

The Stran Technologies' facility in Naugatuck, CT was audited June 17-18, 2003 for compliance with the requirements of MIL-PRF-28876, MIL-PRF-29504 and MIL-STD-790. Based on this audit and acceptance of the corrective actions submitted, an acceptable level of confidence has been established that the compliance with the requirements has been successfully demonstrated; therefore, Stran Technologies is considered a certified manufacturer eligible to manufacture fiber optic connectors and termini.

A MIL-STD 790 certificate for your facility is enclosed with this letter. This certification is valid until withdrawn by the Qualifying Activity. If warranted, this certification may be withdrawn by this Center at any time.

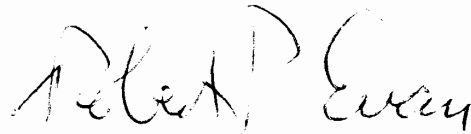

During the certification period, your facility is subject to periodic reaudits. In addition, a drop-in audit in accordance with the requirements of MIL-STD-790 may be performed.

The results of the Defense Supply Center, Columbus (DSCC) audit held on June 17-18, 2003 were found by examining a sampling of the manufacturer's normal manufacturing, testing and processing procedures. The acceptance of the corrective actions from the above referenced audit does not relieve the manufacturer of its contract obligation to deliver product that complies with all specifications requirements.

If you have any questions, please contact Mr. John Casto at 614-692-7076 or email John.Casto@dla.mil.

Sincerely,

A handwritten signature in black ink that reads "Robert P. Evans". The signature is written in a cursive style with a large, prominent "R" and "E".

ROBERT P. EVANS
