

Field Master Motorized Field Polisher

FIELD MASTER

STRAN Technologies FM1000 series fiber connector polishers are unique field or lab polishing machines. The Field Master is equipped with a high-torque DC motor that can operate between 6-12 V DC. A car cigarette lighter outlet is a very handy power source regardless of where in the world your field service support takes you.

The Field Master allows adjustable force through a micrometer to ensure consistent dome finish for a wide variety of connector types and the number of connectors in the fixture. One can polish one, or two, connectors/ferrules in one polish run. Owning a polisher like these is a significant step forward for technicians/installers who are used to polishing connectors by hand using a polishing puck. The improvement in polish quality

and endface geometry, particularly important for singlemode fiber connectorization, is so dramatic one will never want to go back to hand work.

Features:

- Polish up to two connectors or ferrules simultaneously
- Quick release for convenient removal of polishing fixture
- Micrometer force adjustment for perfect pressure on 1 or 2 ferrules and different ferrule sizes
- Low center of gravity for stability
- Small footprint for transportability
- Quick-change mechanism allows rapid removal of polishing fixture
- Universal fixture fits all connectors/ferrules with the same ferrule diameter (PP250 fixture standard for FC, ST, SC and TFOCA GenX)
- Reference plate for precise ferrule protrusion (longer polishing film life, faster run cycle and higher yield)
- Flexure mechanism lock/unlock ferrule/connectors in place firmly and quickly

Part Numbers and Accessories

FM1000	Polisher with 6-12VDC Motor includes: Fixture for 2.5mm ferrule, Polishing rubber pad, and Polishing glass pad
RP1000	Polishing Rubber Pad (80 Durometer)
GP1000	Polishing Glass Disk
PP250	Fixture for 2.5mm ferrule or FC, ST, SC or TFOCA GenX
PP250FA	Fixture for 2.5mm angled ferrule for FC/APC
PP250SA	Fixture for 2.5mm angled ferrule for SC/APC
PP125	Fixture for 1.25mm ferrule or LC
PP125A	Fixture for 1.25mm ferrule for LC/APC
PP318	Fixture for 3.18mm ferrule or SMA905
PPMTRJ	Fixture for MTRJ
PP200	Fixture for 2.00mm ferrules or TacLight, M29504/14 & /15
PP180	Fixture for 1.80mm ferrules
PP160	Fixture for 1.60mm ferrules or M29504/4 & /5
	Polishing film available by request
